1.Introduction

1.1. What is Architecture document?

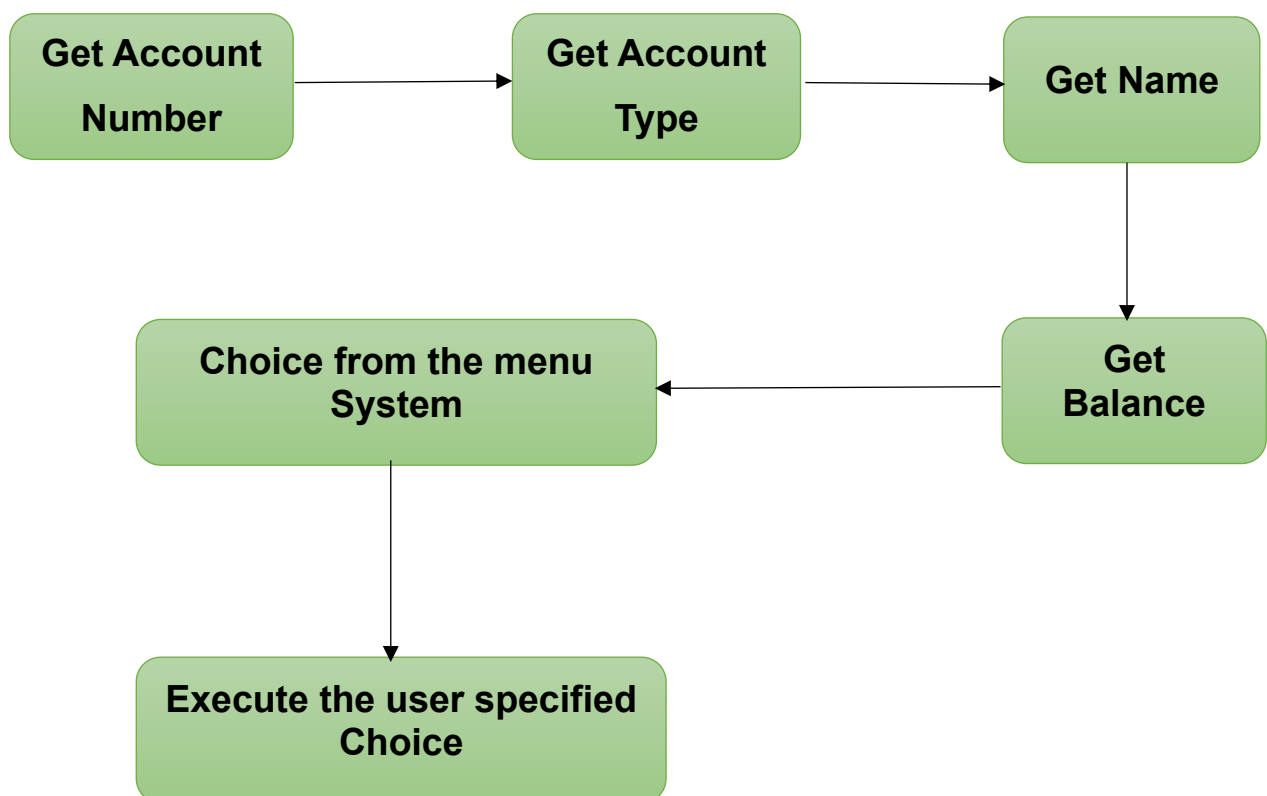

The architecture design document is a technical document describing the components and specifications required to support the solution and ensure that the specific business and technical requirements of the design are satisfied.

1.2 Scope

Architecture is a diverse and dynamic field that offers a wide range of career opportunities. Architects can choose to specialize in different areas of the profession, such as residential design, commercial design, urban planning, sustainable architecture, and many others.
